### **STEAM LINE THERMOWELLS AND ASSEMBLIES**

*T-TEC Steam Line Thermowells and Assemblies are utilized in the demanding conditions found in Power Plant Steam Lines. These designs are characterized by Weld-In Thermowells in various standard and specialty materials including Stainless (316) and Chrome Moly Steels (F11, F22 and F91). These heavy duty, drilled barstock wells are available in Pipe Sizes up to 1 ½ or to customer specifications. Material Test Reports ensure full traceability of materials. Optional Stress Calculations with Certificate are available per ASME PTC 19.3. Stamped*

*tag numbers on each well allow for easy identification in the field. T-TEC Steam Line Assemblies feature rugged, spring loaded TECPAK thermocouple elements to ensure firm sensor tip contact with the Thermowell and maximum performance. Custom designs available.*
